

Automated Billing

Sales Order Approval & Invoicing - Process Automation for NetSuite

Aminian's Automated Billing SuiteApp automates the order approval and billing processes within NetSuite. Ideal for businesses with a large number of sales orders, the Automated Billing bundle empowers your A/R staff by allowing selected orders to be automatically invoiced based on user-defined preferences. This provides increased efficiency and ensures that the order management process begins and ends within your NetSuite account.

Extend NetSuite to standardize your specific billing processes and enjoy the following benefits:

Automatically Approve & Invoice Sales Orders

The Automated Billing SuiteApp approves and converts pending sales orders into invoices that are stored within NetSuite and accessible to all permitted A/R personnel.

Customizable Order Approval Settings

Aminian's Automated Billing bundle allows your A/R staff to automatically approve and invoice sales orders based on user-defined, system-wide settings. Pending sales orders can be designated for automated approval and invoicing based on the following criteria:

- ⚡ Customer
- ⚡ Date Range
- ⚡ Payment Terms
- ⚡ Dollar Amount
- ⚡ Pricing
- ⚡ Ship Date

Exclude Specific Orders or Customers

All sales orders falling outside of the user-defined billing criteria remain in the "Bill Sales Orders" queue within your NetSuite account.

Detailed Tracking and Reporting

Data from all automatically approved & invoiced sales orders is saved in the customer record and transaction record inside your NetSuite account for future tracking and reporting.

Email or Print Automatically Generated Invoices Within NetSuite

Automatically generated invoices created in the Automated Billing bundle can be emailed to your customers or printed for alternative methods of distribution.
