

# SMART ORDER ENTRY

Create sales orders based on a customer's previous purchase history

Smart Order Entry SuiteApp greatly reduces the time associated with generating sales orders for existing customers by allowing Sales Reps to create sales orders based on a customer's purchases over a 30, 60, or 90-day period.

## Automatically generate sales orders based on customer's order history

---

### **Create Sales Orders Based On Recent Purchase History**

Sales Reps now have the ability to easily create sales orders based on any customer's unique purchase history. This provides increased efficiency, prevents miscommunication with customers, and protects against data entry errors in your NetSuite account.

- Standardizes the customer re-order process within NetSuite
- Eliminates the need to research customers' purchase history when creating new orders

### **Instantly Source Items Ordered From Customer Record**

With just the click of a button, Aminian's Smart Order Entry SuiteApp enables Sales Reps to instantly source items purchased over a 30, 60, or 90-day period for any customer.

### **Access to Real-Time Inventory Levels**

Aminian's Smart Order Entry SuiteApp also provides Sales Reps with visibility into available inventory levels when creating a new sales order. This saves time and increases productivity by alerting Sales Reps to any potential shipping delays or back-order situations without having to review a separate inventory report.

### **Detailed Tracking and Reporting**

Sales Orders created through the Aminian Smart Order Entry SuiteApp can be viewed under the "Transactions" tab of the Customer Record for subsequent tracking/reporting.
